

Residential Curbside Collection Notice

Bear Activity at Sun Rivers

August 18, 2020 – Bear activity has been observed in the Sun Rivers area. To avoid food conditioned animals, TteS Natural Resources and the Provincial Conservation Officer Service are proceeding to set traps in the area.

Residents are asked to follow the following guidelines for curbside collection. Put in place to keep neighbourhoods safe and to protect the bears.

These measures are in effect until **November 30th**

- Keep your garbage inside or secured stored until 4 am on collection day when it can be placed onto the curb. Garbage is the number one attractant for bears
- Do not accumulate or improperly store bear attractants.
- Store pet food indoors, keep barbecues clean, and remove bird feeders from May to November to keep bears away.

Don't Feed the Bears

Remember that a fed bear is a dead bear. Feeding bears, even unintentionally, is against the law in BC. (*Dangerous Wildlife Protection Act, section 88.1*).
